SUMMARY STATEMENT

Meticulous Business Analyst with 3 years of experience in working with requirements elicitation, analysis and documentation within an Agile methodology framework.
History of assisting companies of different domains, such as medical high-tech project intended to assist surgeons with pre-operative planning and fintech project that delivers asset data management powered by blockchain. Having experience also as a team leader, passionate and proficient about communication, solving industry problems and dependencies as well as decision making.

WORK EXPERIENCE

01/2022 – 11/2022

Company: Dev.Pro\Inveniam, Portugal Lisbon
Middle Business Analyst

Dev.Pro is a US-based outsource company of people who value high ethical standards and have delivered superior software products since 2011.

Project: Blockchain web project. The platform keeps a comprehensive record of all activity within the system, recording milestone events, transaction artifacts, and user interactions on the Ethereum distributed ledger as a series of blockchain transactions that are immutably linked to information archived within the Inveniam.io system

Responsibilities:

- Work with product managers and other stakeholders in terms of business needs, requirements, functionality and improvement opportunities;

- Elicitation, analysis and documentation of software requirements into detailed specifications in the form of user stories and acceptance criteria;

- Stakeholders representation for the development team and assistance with clarification of the clients' requirements;

- Management of changes requested by stakeholders in tight collaboration with the product manager and developers

- Identification and resolution of issues with conflicting requirements;

- Presentation of Sprint results for stakeholders within Demo

- Facilitation of Agile ceremonies (dailys, planning, grooming, review)

07/2014 – 12/2021

Company: Materialise, Kyiv Ukraine

Materialise is a dynamic international high-tech company, founded in 1990 and headquartered in Belgium, with over 2,100 employees worldwide. Materialise's mission is to innovate for a better and healthier world through its software and hardware infrastructure and in-depth knowledge of additive manufacturing (also known as 3D Printing). Customers are in diverse industries, such as automotive, aerospace, medical, research and academia.

Functional/system analyst

Project: SurgiCase Shoulder Planner is intended to be used as a pre-surgical planner for simulation of surgical interventions for shoulder orthopedic surgery. The software is used to assist in the positioning of shoulder components. SurgiCase Shoulder Planner allows the surgeon to visualize, measure, reconstruct, annotate and edit pre-surgical plan data. The software leads to the generation of a surgery report along with a pre-surgical plan data file which can be used as input data to design the Materialise Shoulder Guide and Models

Responsibilities:

- Requirements elicitation and ideation on solutions in close collaboration with project stakeholders;

- Functional and non-functional requirements elicitation and development;

- Documentation and managing requirements according to medical regulations;
